

I am Anne Kurian

Software Developer/Frontend Developer

- 14 years of experience in Software Development.
- Managed teams of up to 10 members.
- Developed web applications with improved user experience by 20%.
- Successfully completed major projects including an Underwater Asset Tracking project and a Water Quality Monitoring Solution.

About me

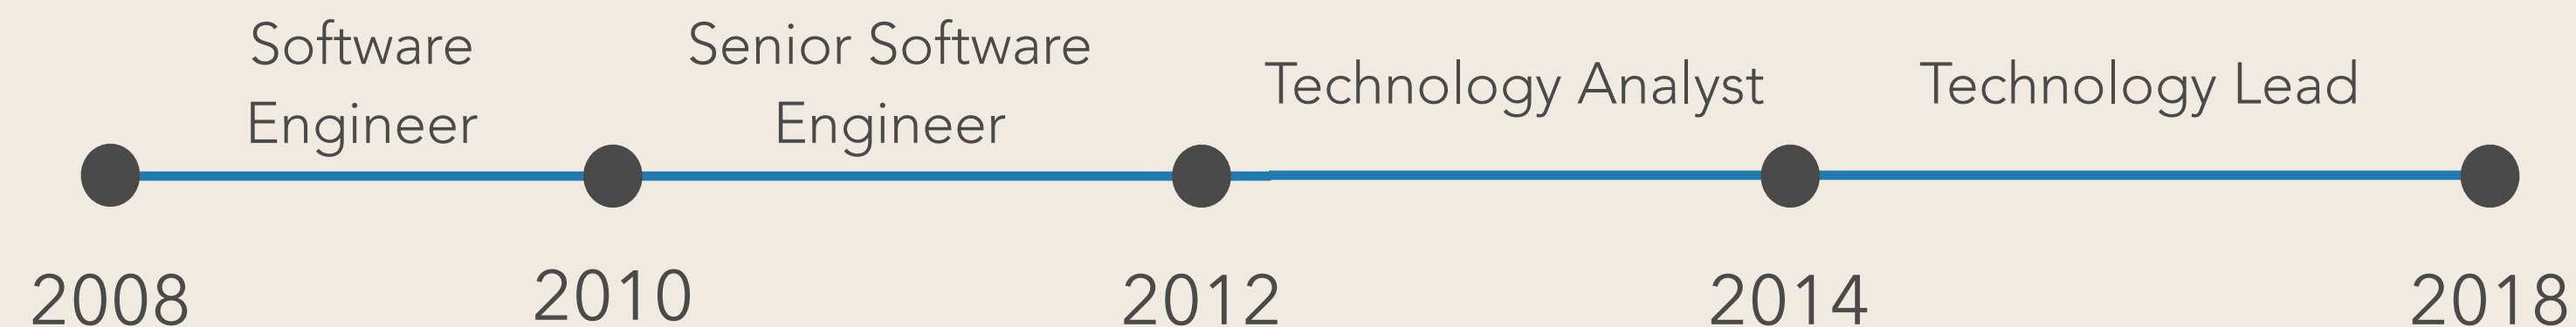

Since I first started using computers in high school, I've been captivated by programming. I enjoy working on front-end development with JavaScript, designing UIs, and developing web applications. I am passionate about crafting intuitive, user-friendly applications. Currently, my main focus is on web application development, and I'm eagerly seeking opportunities to apply my skills in real-world projects.

Qualifications

Bachelor of Technology in Electronics and Communication Engineering

Work Experience

- Infosys, India and Singapore (2008 - 2018)

- Subnero, Singapore (2018 - 2022)

Software Engineer

My industry experience

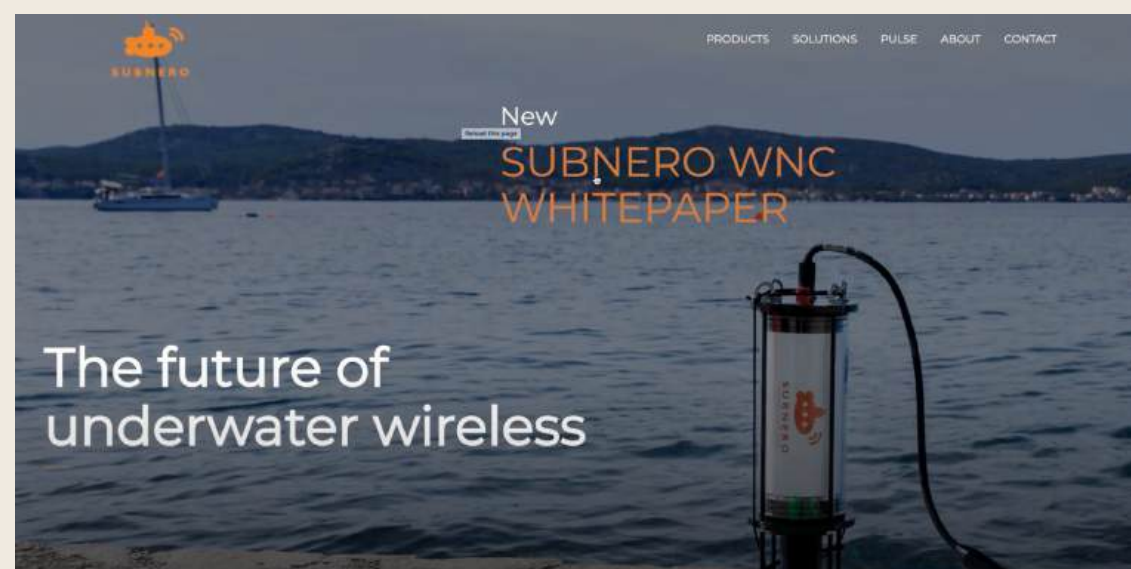

Finacle Customization and Testing

Led small teams and worked on projects for **Finacle**, an industry-leading digital banking solution, contributing to the successful customization and implementation for multiple clients.

Web applications for Underwater Wireless solutions

Developed **responsive user interfaces** and dashboards for Subnero's underwater communication solutions, leading to a 30% increase in user satisfaction.

Website management for Subnero

Managed and re-designed the company's **website**, significantly increasing user engagement and traffic.

My achievements

Successfully demonstrated an underwater asset tracking application with a **network reliability of 80%** and increase in **user satisfaction by 30%**.

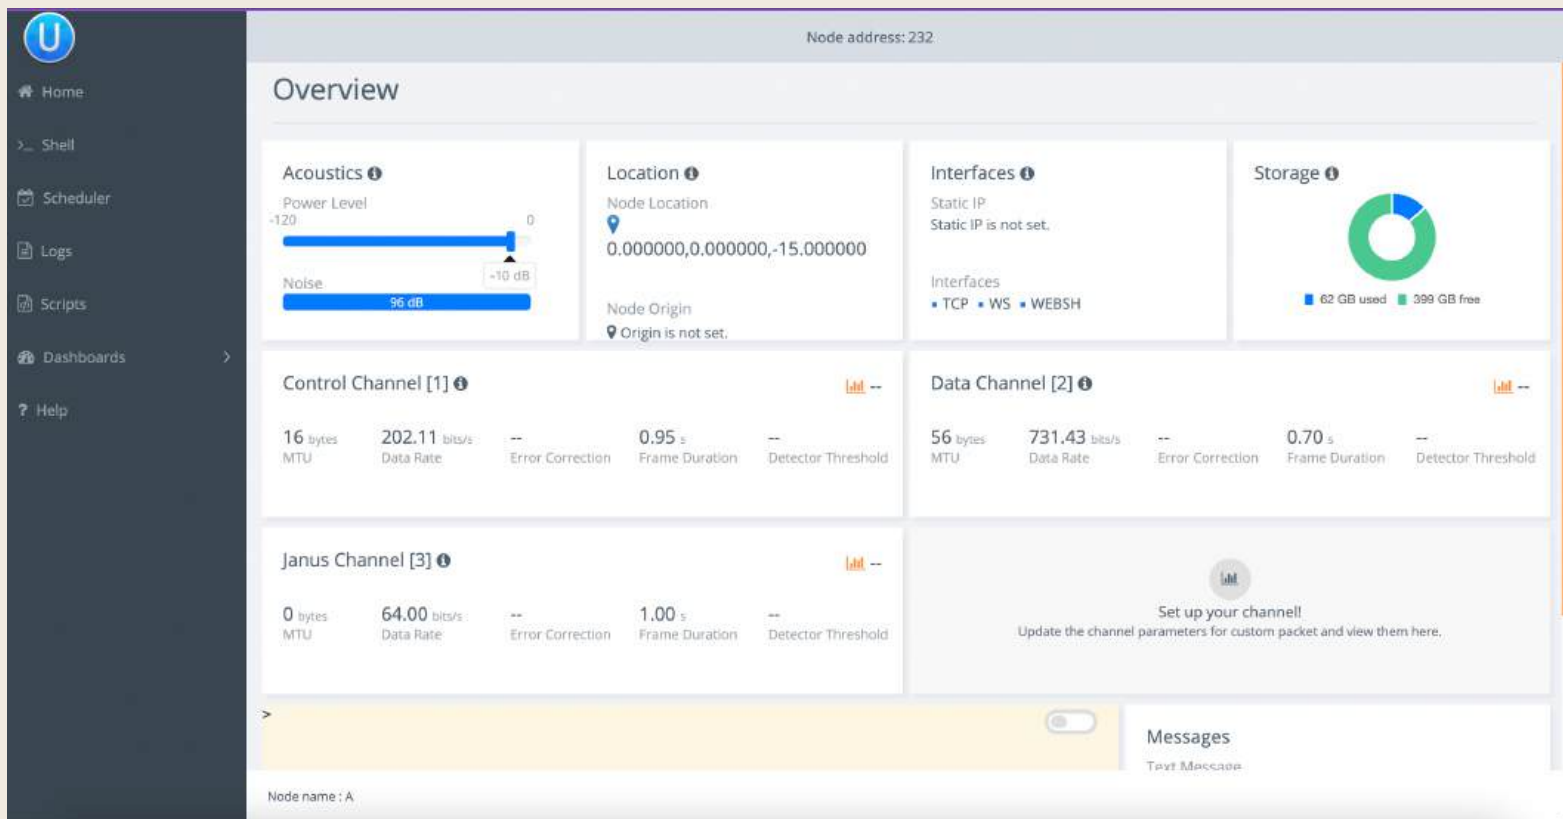

Led backend development of a water quality monitoring application, enhancing **data processing efficiency by 30%** and **reducing infrastructure costs by 20%**.

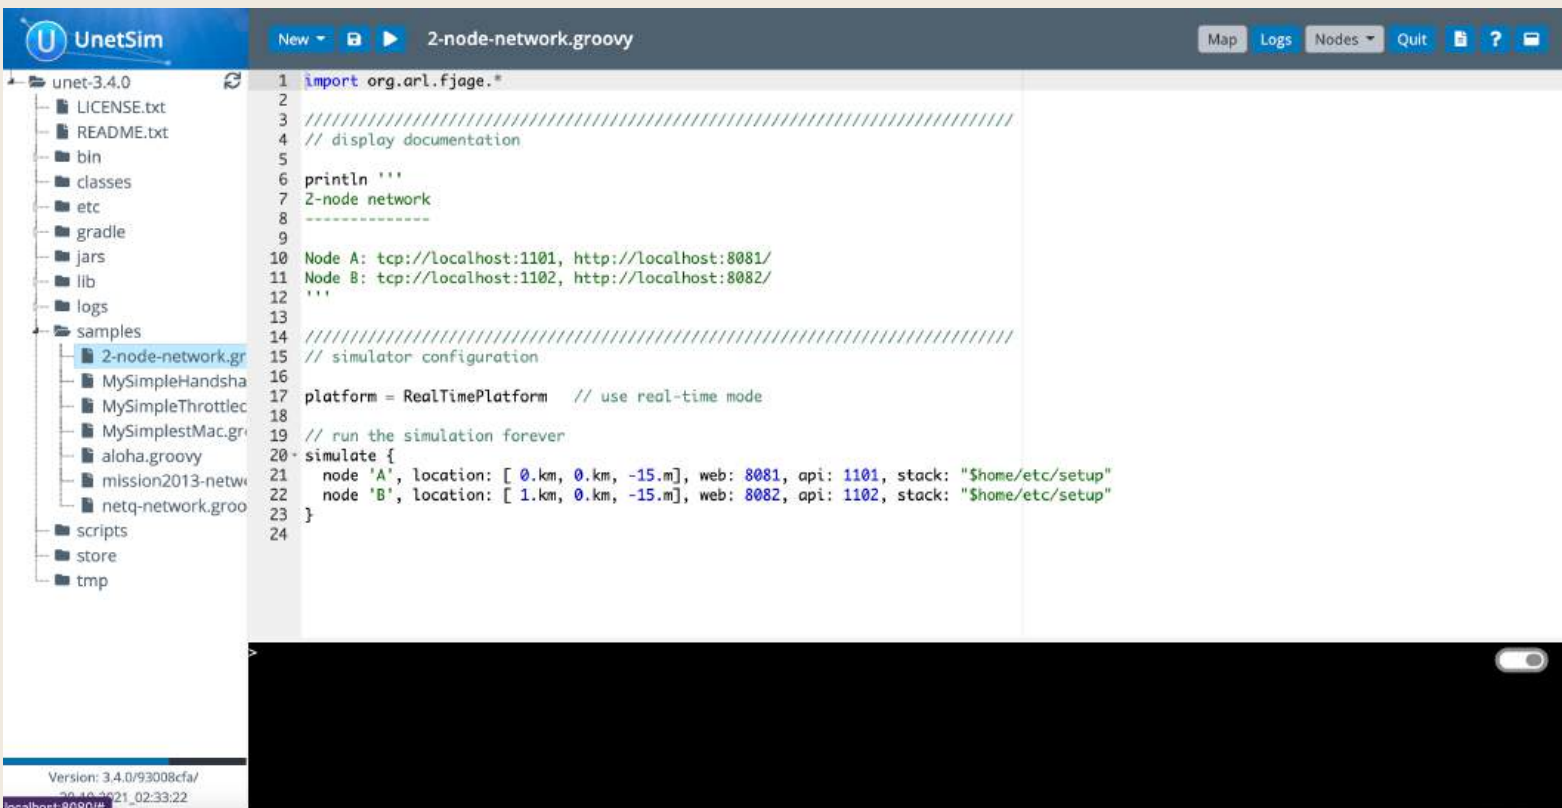

Successfully revamped Subnero's website increasing **user engagement by 30%** and **website traffic by 15%**.
